Languages:
- Advance: C++
- Intermediate: C
- Novice: JavaScript

Tools:
- Git / GitHub

Framework and Libraries:
- Node JS • Express JS • React

Technologies:
- CSS • HTML • Wordpress

AWARDS

RUNNER'S UP IN IFPC

(Intra FAST Programming Contest)
Ranked 2nd out of 33 teams

PROJECTS

QR CODE GENERATOR APPLICATION   Jan 2023
- Developed a web application using Node JS and Express JS to generate QR codes for websites entered by users.
- Leveraged the JavaScript programming language to handle user input and interact with the QR Code API provided by API-Ninjas to create high-quality QR codes.
- Designed the frontend of the application using HTML and Bootstrap 4 to provide a visually appealing and intuitive interface for creating QR codes.

RECIPE SEARCH APPLICATION   Jan 2023
- Developed a web application that uses Node JS and Express JS that allows users to browse recipes of various dishes from around the world.

AIR QUALITY INDEX (AQI) APPLICATION   Jan 2023
- Utilized JavaScript to handle user input and interact with the Air Quality API provided by API-Ninjas to retrieve real-time air quality data.

NUTRITION APPLICATION   Jan 2023
- Developed a web application that enables users to search for the nutritional values of thousands of foods and dishes.
- Designed the frontend of the application using HTML and Bootstrap 4 to provide a user-friendly interface for searching and displaying nutrition data.

CERTIFICATIONS

INTRODUCTION TO FRONT-END DEVELOPMENT | Meta
Dec 2022 – Jan 2023
I gained practical experience in creating and styling web pages using HTML and CSS. The course covered the basics of HTML markup, CSS selectors, layout, and responsive design techniques.

PROGRAMMING WITH JAVASCRIPT | Meta
Jan 2023 – Feb 2023
Through the course, I gained hands-on experience in writing JavaScript functions, using array and object methods, and manipulating data structures. I developed a strong foundation in JavaScript programming, which I have applied to real-world web development projects.

ADVANCED REACT | Meta
Mar 2023 – Apr 2023
I learned to use reusable components to render dynamic views and organize projects for scalability. I also gained experience creating dynamic web pages and apps with props and forms, building applications that incorporate user interaction.

VERSION CONTROL | Meta
Jan 2023
The course provided me with a strong foundation in implementing version control systems, navigating and configuring software projects using the command line, and using GitHub to manage code revisions and collaborate with team members.
